ANNUAL INVENTORY

OF AVAILABLE USDA

POPULAR PUBLICATIONS

1961

**for use of the State and
County Extension Offices
in ordering USDA publications**

Growth Through Agricultural Progress

*Federal Extension Service and Office of Information
U. S. Department of Agriculture
and State Land-Grant Colleges cooperating*

Attention County Extension Workers:

This Inventory was prepared to help you keep your supplies of USDA popular publications up to date. It will help you in two ways: in ordering new publications and in getting rid of publications that are obsolete. And if you keep your Inventory List up to date, you won't be disappointed by ordering publications that are no longer available.

How To Use This List

This reference list, compiled by the USDA Office of Information and the Federal Extension Service, is composed of USDA popular publications and selected Federal Extension Service publications that may currently be ordered free, in quantity, by Cooperative Extension workers. This inventory, plus the monthly supplement, is an up-to-date guide designed especially for Extension workers to use in ordering supplies of free popular USDA publications.

In making up your orders, please use this inventory. It provides the latest information on what items are current and in supply. For your convenience in ordering, the publications are listed both numerically and by subject-matter. Space has been left at the bottom of each page to permit you to add additional listings of new publications. This will aid in keeping your inventory current.

CONTENTS

SECTION I Numerical listing of available publications by series and titles.

SECTION II Subject-matter listing of publications according to content.

SECTION III Numerical listing of obsolete publications.

SPECIAL NOTES

1. Publications Dates. Please check issue dates of bulletins you have in stock against the dates on this list. If your copies carry an earlier date, discard them and order a new supply from the most recent edition. If any of your copies are listed in the Replaced column, destroy them and order the newer ones.
2. Unlisted Copies. Publications unlisted here may not be obsolete. Do not discard them without checking them with the proper State Extension Specialist or the Publications Distribution Officer of the Federal Extension Service.
3. Slight Revisions. An earlier edition of a publication that has recently been Slightly Revised may still be useful. Compare it with the new edition before deciding to discard.
4. Obsolete Publications. Use the numerical listing of obsolete publications in Section III as a convenient check against your bulletin supplies. Immediately discard any supply of publications you may have that are on the list.
5. Monthly Supplement. State Publication Distribution Officers will be provided with a monthly supplement to this listing. The supplement will give notice:
 - (a) of new and revised publications as they become available.
 - (b) of publications that have become obsolete, have been discontinued, or those not being reprinted because of pending revision.
6. Other Lists. Please do not use other lists for bulk ordering as they are not completely up to date. Use other lists for reference purposes, for requesting single copies, or for publications on sale only.
7. Ordering. When ordering publications, please follow instructions from your State Publications Distribution Officer. We suggest that you hold the number of copies in your order to the minimum necessary for early usage and distribution rather than including requests for copies for storage or later use. This will make it easier to distribute copies equitably to all States. Unless otherwise instructed by your State office, requests for publications should be addressed to:
